## CRITERION-I:CURRICULAR ASPECT

### Metric Level Deviations

1.2.1 Number of Certificate/Value added courses offered and online courses of MOOCs, SWAYAM, NPTEL etc. (where the students of the institution have enrolled and successfully completed during the last five years).

HEI Input : 05

HEI Change Input :05

DVV clarification	HEI Response
1. HEI is requested to Kindly note that FEW Link provided for all the required documents is showing ERROR " 404 " Please provide a valid Link for all the supporting documents and any other relevant data	As per the demand made by DVV partner we are providing valid link of this 1.21 metric
2. Kindly provide the list of the students year wise and course wise for the last five years. As the data provided in the (lists) supporting documents and in the data template, is not matching. So please relook and provide correct revised data	As per the demand made by DVV partner we are providing the list of the students year wise and course wise for the last five years.
3. Please provide the model certificates for the students..	As per the demand made by DVV partner we are providing model certificates for the students.
4. Please provide detailed report of each program as per revised data academic year wise	As per the demand made by DVV partner we are providing detailed report of each program as per revised data academic year wise from 2018-2019 to 2022-2023

### HEI Response Document

Sr.No.	Document
1.	List of the student year wise and course wise for the last five years.
2.	Model certificates for the students.
3.	Report of each program as per revised data academic year wise.

Nursery Development Certificate program

**Annual report (2022-23)**

During the year 2022-23, department of botany admitted total 15 students for Nursery Development Certificate course. Firstly, we distributed syllabus of theory and practical to students. In this students were taught that different plants are created by Cutting, Budding, Grafting, and Layering in the forest nursery near to college campus. Students done all the nursery practices in the nursery like soil preparation, compost making, weeding, fertilizer applications etc. In rainy season we collected and cultivated hydrophytes in the college. This course is completed in 3 months at the conclusion of the course; certificates were given to the participating students. The following activities done by students during the course as follows.

Visit to forest nursery

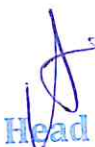

Soil bags filling

Weeding from bamboo plants

Well developed Almond plants

Nursery Development Certificate program

### Annual report (2021-22)

In the year 2021-22, total 21 students admitted. In the beginning we start the theoretical part in the form of the lecture. Practical part done in the college garden or other nurseries. Every Saturday we took lectures and explain all the detail about the nursery like terms related to nursery. Basically in the beginning we started from the tools of nursery and its applications like secateurs, knife, khurpi, garden fork, spade, pots, spray pumps etc. we done all the practical in the college campus or forest nursery located near to college campus. All students done nursery activities in the nursery like preparing of soil, bag filling, seed sowing, cultivation, fertilizers applications, pest control, diseases, cutting, grafting, weeding, watering etc. The following activities done during course time as follows.

Preparation of soil

Mixture of soil and compost

Bag filling

Bags ready for cultivation

Cultivation of medicinal plant

Cultivation of forest plant

Nursery Development Certificate program

**Annual report (2020-21)**

Our academic year was started in the month of July 2020. Total 30 students admitted. First half of the academic semester was going well. Syllabus for this is to visit and work with nursery and work for 6 months. But unfortunately there was pandemic situation due to Covid 19. We constructed new vermicomposting plant in the new college building and provided fresh compost to the farmer and students before pandemic situation. The college was closed during covid, so there is less physical activity of nursery in the college. We start one program for student i.e. "Nursery at home", they planted and maintained one medicinal or fruit plant in the home. Students sent status of plant through photos to teachers.

**New vermicomposting plant**

**Weeding & watering to the compost**

**Students planted different plants in home garden**

**Annual report (2019-20)**

In the year of 2019-20 total 15 student admitted to this program. In the beginning we start the theoretical part in the form of the lecture. We deeply explain every term related to the nursery. We visit to the different types of nursery like forest, ornamental, medicinal etc. we introduced different types of soil to the students. In 2019-20, the basic nursery techniques we tough to the students like preparation of bed, preparation of soil for bed, types of bed, seed sowing methods. In the week every Saturday we conduct theory lecture and practical as per syllabus. We visited vegetable nursery near to Nashik. We perform all the activities in the forest nursery near to the college campus. This year the students perform some activities is listed below.

**Preparation of Soil**

**Filling of Bags**

**Sowing of seeds**

**Weeding from planted bags**

**Mushroom Cultivation Certificate course**  
(2019-2020)

Mushroom farming is one of the most profitable agri-businesses that one can start with a low investment and less space. In India, it is growing gradually as an alternative source of income for many people. The module is intended to concentrate on the basic needs of a cottage scale industry. Button mushroom, oyster mushroom and paddy straw mushrooms are the three major types used for cultivation in India. In the year 2019-20 total 26 students admitted. Total period of mushroom course was three month. The oyster mushrooms were cultivated to train the students with the basic know-how of mushroom growth. These techniques efficiently incorporate the farmyard by products like straw, hay etc. as a substratum to grow mushrooms. The students were given training that encompassed sterilization techniques for substratum and the culture room, bagging, media preparation etc. The training began with the demonstration of fumigation of mushroom rooms followed by sterilization of straw for bagging. Upkeep of the bags and harvesting methods are taught to the students. Demonstrations for media preparation, spawn generation, etc. are also covered in the course module. It takes approximately 15 weeks to complete an entire production cycle, from the start of composting to the final steaming off after harvesting has ended. The course was completed with distribution of certificates. The activities of mushroom cultivation course are given below.

**Mushroom Cultivation Certificate course  
(2022-2023)**

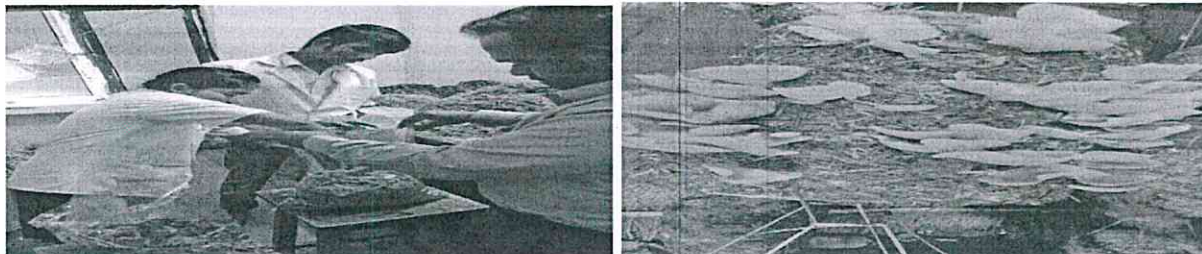

After pandemic situation in year 2022-23, college again started offline mushroom cultivation course for college students. Through this course we will be able to provide the students a basic as well as applied technology of mushroom cultivation which will make them stand on their own feet at the same time can develop the self-dependent individuals. The mushroom cultivation technology may provide one area which may fulfill the global needs of food. The certificate course programme in mushroom cultivation will be aimed to create and share knowledge to ensure safe, healthy and self-dependent business for the betterment of the human beings. total 8 students was admitted. In starting we distributed syllabus of this course. In every Saturday we conduct theory lectures for two month. The practical session we took in the end of the every month. We visited various commercial mushroom industries near to Nashik. Students done all the practises related to the mushroom cultivation. The all mushroom cultivation practises given below.

**Sterilization, media preparation, bag filling procedure, Spawn culture in ring form**

# Report on Apiculture Program Enrollment (2022-23)

## Introduction

Apiculture, or beekeeping, is an essential agricultural practice that supports environmental sustainability and economic development. By managing bee colonies for honey production, pollination, and other hive products, apiculture plays a vital role in maintaining biodiversity and enhancing agricultural productivity. This report provides an overview of an Apiculture program with a total enrollment of 32 students.

## Program Enrollment Details

The Apiculture program has attracted **32 students**, consisting of **24 male students** and **8 female students**, demonstrating significant interest and diversity in this critical field.

## Enrollment Demographics

- **Total Students:** 32
- **Male Students:** 24 (75%)
- **Female Students:** 8 (25%)

The gender distribution shows a predominant male participation, though the presence of 8 female students reflects growing inclusivity and interest in apiculture among women.

## Program Components

The Apiculture program includes a blend of theoretical and practical training to equip students with the skills and knowledge required for successful beekeeping.

1. **Theoretical Knowledge:**
  - Bee biology and behavior
  - The role of pollinators in ecosystems
  - Economic and environmental importance of apiculture
2. **Practical Training:**
  - Beehive construction and maintenance
  - Honey extraction and processing techniques
  - Managing bee health and preventing colony collapse disorders

## Objectives:

- To impart comprehensive knowledge about beekeeping techniques
- To promote sustainable practices in apiculture
- To prepare students for entrepreneurial ventures or employment in the apiculture industry

## Observations

- **High Enrollment:** The program's 32 participants indicate a strong interest in apiculture as a vocational and ecological field.
- **Gender Representation:** While the male-to-female ratio leans heavily toward male students (75% male vs. 25% female), the inclusion of 8 female students suggests increasing awareness and opportunities for women in apiculture.

## Conclusion

The Apiculture program's enrollment of 32 students, including 24 males and 8 females,

highlights the growing recognition of the importance of beekeeping. The participation of both genders is a positive sign, though efforts could be made to further encourage female enrollment in the future.

By equipping students with theoretical knowledge and practical skills, this program is contributing to sustainable agriculture, environmental conservation, and economic opportunities. The Apiculture program holds immense potential for promoting ecological balance and supporting livelihoods, making it a valuable addition to agricultural education.

# Report on Apiculture Program Enrollment(2021-22)

## Introduction

Apiculture, commonly known as beekeeping, is a vital agricultural practice that supports biodiversity and enhances pollination, which is critical for crop production. This field combines ecological sustainability with economic opportunities through honey production and related products. The following report outlines the details of an Apiculture program with an enrolled cohort of 24 students.

## Program Enrollment Details

The Apiculture program has a total enrollment of **24 students**, consisting of **18 male students** and **6 female students**, showcasing an enthusiastic participation in this important vocational field.

## Enrollment Demographics

- **Total Students:** 24
- **Male Students:** 18 (75%)
- **Female Students:** 6 (25%)

The enrollment demographics reveal a significant male majority, although female participation is commendable, reflecting a growing interest in apiculture among women.

## Program Structure

The Apiculture program is designed to provide both theoretical and hands-on learning experiences to students, focusing on key areas such as:

1. **Theoretical Knowledge:**
  - Understanding bee species and hive dynamics
  - Role of bees in pollination and agriculture
  - Environmental and economic significance of beekeeping
2. **Practical Training:**
  - Construction and maintenance of beehives
  - Harvesting honey and other hive products
  - Techniques for ensuring the health and sustainability of bee colonies

## Key Objectives:

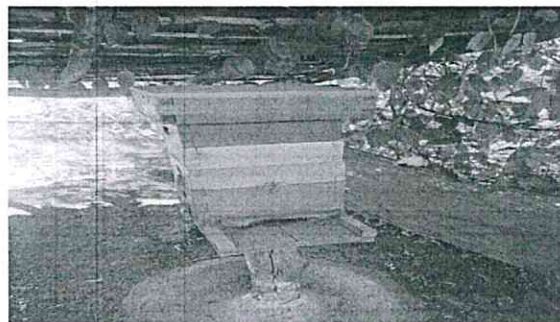

- Equip students with the skills to establish and manage apiaries
- Promote sustainable beekeeping practices
- Raise awareness about the critical role of pollinators in ecosystems

## Observations

- The program demonstrates a positive trend in vocational interest among young individuals.
- The 6 female participants reflect a growing inclusivity in apiculture, a field traditionally dominated by men.

### Conclusion

The Apiculture program's current enrollment of 24 students, with 18 males and 6 females, underscores the importance of fostering interest in this critical agricultural practice. While male students make up the majority, the participation of female students is a promising sign of evolving perceptions and increasing inclusivity. Future efforts should focus on expanding access and promoting gender balance to encourage diverse participation in apiculture. This program holds the potential to contribute significantly to ecological conservation, agricultural productivity, and sustainable livelihoods for its graduates.

## Report on Apiculture Program Enrollment (2020-21)

### Introduction

Apiculture, the practice of beekeeping, is an essential activity for ecological balance and agricultural productivity. It contributes to biodiversity and ensures the pollination of plants and crops. In the context of vocational education, the Apiculture program provides theoretical and practical knowledge on managing bee colonies, honey production, and related activities.

### Program Overview

The Apiculture program enrolled a total of **25 students**, comprising **16 male students** and **9 female students**, showcasing a diverse group of participants with an interest in this field.

### Demographics

- **Total Students:** 25
- **Male Students:** 16 (64%)
- **Female Students:** 9 (36%)

This gender distribution indicates a notable male majority; however, the participation of female students highlights increasing inclusivity in a traditionally male-dominated field.

### Course Highlights

1. **Theoretical Knowledge:**
  - Bee biology and behavior
  - Types of bees and their roles in the hive
  - Importance of pollination in agriculture
2. **Practical Training:**
  - Setting up and maintaining beehives
  - Honey extraction and processing techniques
  - Sustainable beekeeping practices
3. **Outcomes:**
  - Hands-on experience in managing bee colonies
  - Skills to contribute to honey production and related industries
  - Awareness of ecological and economic importance of apiculture

### Conclusion

The Apiculture program has attracted a balanced mix of individuals who are keen to contribute to sustainable agriculture and environmental conservation. The enrollment of 16 male and 9 female students indicates an encouraging interest from both genders, paving the way for a more inclusive and knowledgeable future workforce in this field.

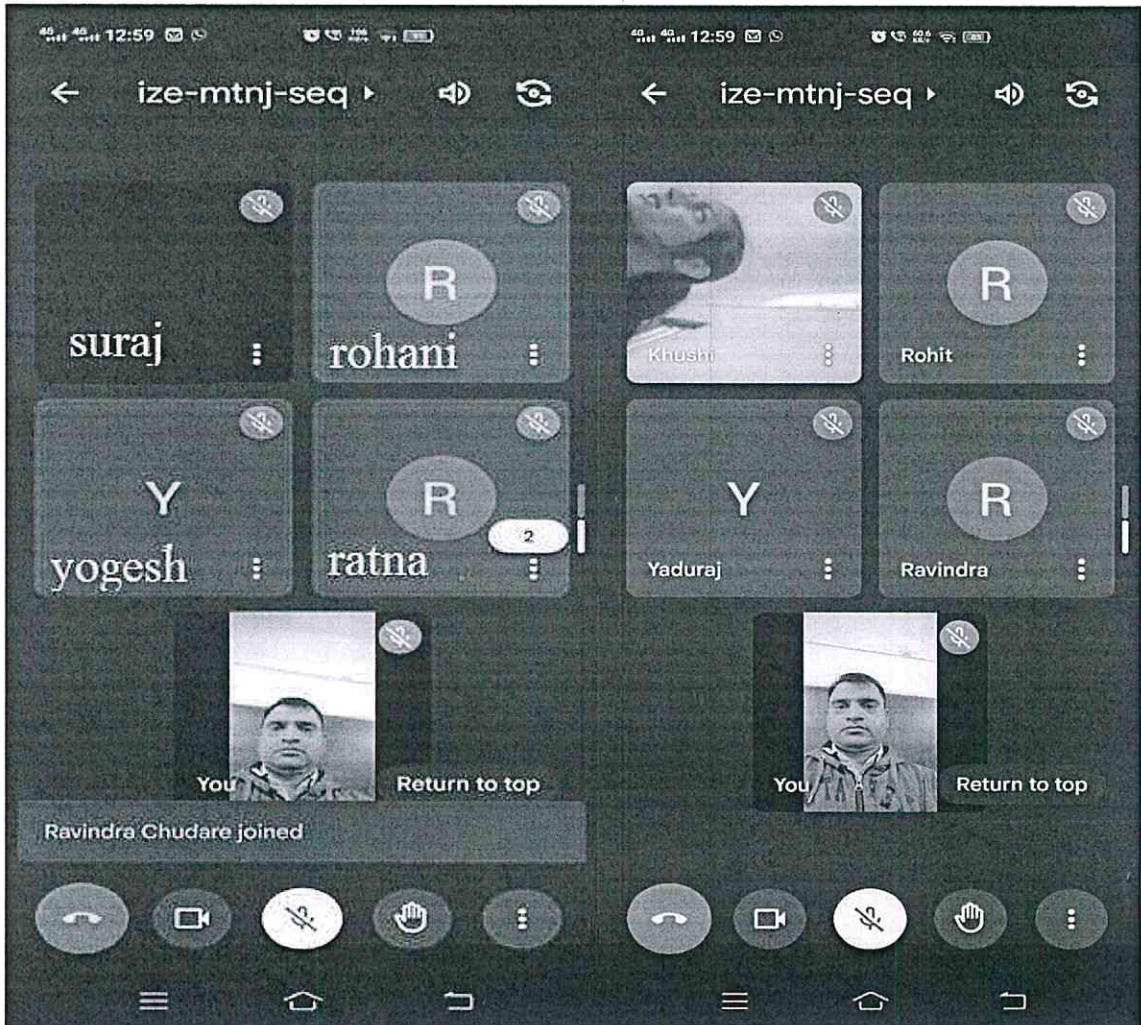

Further initiatives could focus on promoting awareness and expanding participation, especially among underrepresented groups, to strengthen the impact of apiculture on community and global scales.
